

# Quick Start Pack for Pharmacy Outreach in your Hometown

We must stand in opposition to Walgreens and CVS for their commitments to fill chemical abortion prescriptions (initially in six states).

We must deter Walmart and other pharmacy chains from following the appalling lead of Walgreens and CVS.

**You receive a Quick Start Pack of 10 signs and 100 flyers within ten days of your request.**

The signs are tested, powerful, readable and printed on sturdy corrugated plastic:

- Four signs naming CVS on one side and naming Walgreens on the other side. (24"x24").
- Two "Abortion is not Healthcare". Same on each side. (24"x18")
- Two Abortion Pill Reversal signs. Same on each side. (24"x18")
- Two "Move Your Rx!" Same on each side. (24"x12")

Hold these signs or set some in the ground with metal stakes. You are welcome to use other signs as well.

100 Chemical Abortion flyers. Plus PDF file for printing more. Additional signs sets are \$50, half of our cost.

We ask you to deliver at least one hour of outreach per month for at least four months. Of course, we encourage you to continue.

**Complete your order:** Contact John Pisciotta (254-644-0407 or [prolifewaco@gmail.com](mailto:prolifewaco@gmail.com)). Provide your address and discuss your plans. Your Quick Start Pack will arrive within 10 days.

## TOP 4 REASONS FOR PHARMACY OUTREACH

### 1. **Provide strong opposition to state-by-state expansion.**

CVS and Walgreens launched their abortion Rx business in March of 2024 in CA, IL, NY, PA, MA, and RI. **We must deliver strong and unrelenting Pharmacy Outreach on their sidewalks.** Stopping or state-to-state expansion will be a pro-life victory. With Trump opposition to woke ideologies, these two chains may shut their abortion business down COMPLETELY.

### 2. **We send messages to other pharmacy chains to STAY OUT.**

Walmart, Costco, and large grocery chains have withstood political threats to this point. We must protest strongly and broadly to keep these businesses on the sidelines. Our chemical abortion flyer presents the easy steps for transferring prescriptions.

### 3. **Chemical abortion education.**

Pharmacy Outreach provides a huge opportunity to inform and educate on chemical abortion. We have created a three-fold flyer on chemical abortion, the procedure used to commit well over 60% of the abortions in America.

### 4. **Public image and financial loss.**

Using signs, literature, and conversations, we bring public image and financial losses to CVS and Walgreens. Nothing disrupts a business work day more than opposition on sidewalks seen by employees, customers and the community. Deadly **national** corporate decisions demand our **nationwide** response.
